Experience

Software Engineer I

Nike

Jun. 2025 - Present

Bengaluru, Karnataka

- Architected and delivered a **serverless full-stack CRUD platform** using **API Gateway**, **AWS Lambda**, **DynamoDB**, **OpenSearch**, designing **REST APIs** following **Domain-Driven Design (DDD)** principles to consolidate **3 legacy APIs** into a single solution and eliminate **~33K lines of code**.
- Engineered a secure **REST API** with **AWS Lambda** and a reusable **React custom hook**, closing a critical QR-tracking gap across **40%** of the product catalog while owning feature implementation through production release.
- Designed and implemented a **serverless typeahead search** using **OpenSearch**, **AWS Lambda**, and **React**, reducing manual product lookup effort by **65%** for **1,200+** internal users.
- Led development of a two-application **Nx monorepo** with a shared **Vite component library** and **Rspack host shell**, becoming the team's **top contributor** with over **2×** the commit volume of the next highest contributor.
- Built and integrated **Module Federation-based React microfrontends** following strict **TypeScript** standards, ensuring **100%** design parity across multiple host applications.
- Developed and shipped a **schema-validated CRUD interface** for color and pricing management, reducing operational turnaround time by **50%** for **1,200+** users.

Frontend Developer Intern

Curowell Healthcare Private Ltd

Oct. 2024 - Apr. 2025

Bengaluru, Karnataka

- Built features for a **healthcare SaaS platform** using **Next.js**, **TypeScript**, and **Tailwind CSS**, significantly enhancing user experience.
- Developed the **DND form microfrontend**, improving user interaction by **30%**.
- Collaborated with designers to build reusable UI components, reducing component development time by **25%**.

Full Stack Developer Intern

Defence Research and Development Organisation (DRDO)

Nov. 2023

Bengaluru, Karnataka

- Boosted booking efficiency by **50%** with a **Facility Bookings Manager** developed using **TypeScript**, **React**, **Node.js**, and **MySQL** within one month.
- Built **REST APIs** and resolved **100%** of client issues, ensuring seamless platform integration.
- Increased user satisfaction by **40%** through a user-friendly frontend interface that enhanced facility management.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Styled Components, Prisma, Auth.js, Zustand, Redux

Cloud & Architecture: AWS (API Gateway, Lambda, DynamoDB, OpenSearch, Step Functions), REST APIs, Domain-Driven Design (DDD), Microfrontends (Module Federation), Nx Monorepo, Vite, Docker

Databases: DynamoDB, OpenSearch, MongoDB, PostgreSQL, MySQL, Firebase

Developer Tools & Practices: Git, GitHub, GitHub Actions, Jenkins, Jest, Vitest, Postman, Hoppscotch, Figma (UX/UI Design & Prototyping), VS Code

Certifications & Achievements

- AWS Amplify Fullstack TypeScript Challenge Winner** (Global Hackathon Winner)
- Google UX Design Professional Certificate (**Coursera**) | AWS Cloud Practitioner Essentials (**Coursera**)
- Frontend Developer Career Path (**Scrimba**) | Advanced React (**Scrimba**)

Projects

QuickEdit: AI-Powered Image & Video Editor | *Next.js, Tailwind CSS, Zustand, Cloudinary, MongoDB*

GitHub

- Built an **AI-powered** media editing platform using **Next.js**, **MongoDB**, and **Cloudinary**, enabling **real-time** background removal, object extraction, and transcription, improving editing efficiency by **60%**.
- Implemented responsive UI with **Tailwind CSS**, secure authentication using **OAuth** and **Auth.js**, and seamless state synchronization between **Zustand**, **MongoDB**, and **Cloudinary**.

FigPro | *Next.js, TypeScript, Tailwind CSS, Fabric.js, Liveblocks*

GitHub

- Developed **FigPro**, a collaborative web-based design platform using **Next.js**, **TypeScript**, **Fabric.js**, and **Liveblocks**, enabling real-time multi-user collaboration and improving team productivity by **30%**.
- Implemented real-time canvas synchronization, presence awareness, and collaborative editing using **Liveblocks**, increasing user engagement during design sessions by **40%**.

Education

MVJ College Of Engineering

Bachelor of Technology in Computer Science | **CGPA: 9.44**

Dec. 2021 – Jun. 2025

Bengaluru, Karnataka
